

Peppol ID

Malaysia Peppol ID Format

Malaysia's ISO 6523 Code

- The ISO 6523 Code for Malaysia is 0230

Special Identifier

- 01 – SSM Number
- 02 – Sabah
- 03 – Sarawak
- 04 – Foreign Businesses
- 05 – Testing Purpose
- 06 – Others
- 07 – Statutory Body
- 08 – Local Authority

Business Identifier

12-digit number – New SSM company registration number including Sabah & Sarawak (only for Private Limited Company/ROC).

5-digit number - for enterprise companies in Sabah & Sarawak

Variable digits –

- i. Foreign companies will start with their country code to indicate the company's country of origin and followed by their existing registration numbers. This is applicable only to foreign companies that do not have an existing Peppol ID.
- ii. Others covers organization with other type of business registration number (e.g. ROS registration number) or special cases of business registration number.
- iii. For Statutory Bodies (SB), start with the acronym of minimum 2 to a maximum of 8 alphabetic characters, followed by two mandatory numeric digits starting with '01'. If the acronym is already in use within the Malaysia SMP, the numeric value should increase sequentially (e.g., '02', '03', until '99').
- iv. For Local Authority (LA), start with the acronym of minimum 2 to a maximum of 8 alphabetic characters, followed by two mandatory numeric digits starting with '01'. If the acronym is already in use within the Malaysia SMP, the numeric value should increase sequentially (e.g., '02', '03', until '99').
